

**Safcor Panalpina's bulletin to our valued partners**

14 April 2011

**Great Success with CargoWise IT Operating System for Safcor Panalpina in Gauteng and Kwa-Zulu Natal**

We are delighted to inform you that our "go-live" with CargoWise in Gauteng and Kwa-Zulu Natal regions has been very successful. As expected, we are experiencing some minor teething problems but these are being dealt with, by our project team, in an efficient and swift manner.

Our users are most excited about the new system and are getting more familiar with the system every day due to the user friendly look and feel of CargoWise.

CargoWise also has an ediWeb Tracker module. This is an integrated real-time Internet based order, freight, cargo and shipment tracking software application that is designed to give our clients 24 X 7 access to cargo, shipment and freight tracking information with the use of an Internet connection and web browser. This provides transparency and will empower clients with the freedom to access real-time accurate information when it is required. We believe that this will be a great value-add for all our clients. Our client servicing teams will be in contact with you shortly to arrange the necessary logon passwords and assist with training on the use of the ediWeb Tracker.

Should you require any further information, we ask that you contact your Client Service person or your Business Unit Manager. We would encourage you to visit the CargoWise website for more detailed information at [www.cargowise.com](http://www.cargowise.com).
